

Moneypaper Advisor, Inc.

Business Continuity & Disaster Recovery Plan

Updated, November 30, 2021

Vita Nelson, President of Moneypaper Advisor, Inc. (the “Firm”), is responsible for the creation of this document and Leonard Barenboim, Chief Compliance Officer (“CCO”), is responsible for keeping it up-to-date. Quarterly reviews of the documentation of compliance reviews by the firm’s compliance personnel will be conducted by an outside compliance professional.

Annual Testing:

An annual test of the disaster recovery plan will be conducted and documented by the CCO. The disaster recovery plan will additionally be reviewed and updated periodically on an interim basis by the advisor’s Chief Executive Officer, which is its President, Vita Nelson.

Action Plan:

In event of daytime disaster or evening disaster, the CCO will send out a group text and e-mail and, if

necessary, will call employees and tell them to report to the alternative location described in this document.

If a disaster occurs during business hours, employees will be informed by the President or by the CCO. They will do their best to ensure all employees have exited the building before leaving him/herself. Employees are instructed to exit the building and await further instructions from the portfolio managers or from emergency services. All personnel leaving Moneypaper Advisor's main office shall gather at 78 Pleasant Ridge Rd. Harrison, NY 10528.

The President is responsible for coordinating with local emergency services. The CCO will conduct mandatory bi-annual evacuation drills. During the drills, the President or her appointed replacement (or the CCO) will describe the overall evacuation procedures as well as their coordination with emergency services and provisions for evacuation of anyone who might be disabled at the time of the disaster.

Emergency contact information the following:

Call 911

Vita Nelson: 914-419-2154, vitajnelson@moneypaper.com,

Susana Aldas: 973-650-2767, saldas@moneypaper.com, saldascorporate@yahoo.com

Byron Perez: 914-565-0187, bperez1020@gmail.com

Clifford Nelson: 914-310-1880, Clifford.s.nelson@live.com

Information is updated when changes occur and the BCP shall be reviewed by the President and the CCO not less frequently than once annually

Firm Policy

The Firm recognizes that it cannot be responsible for emergencies caused by widescale disruptions. In case of an emergency that disrupts the Firm's operations, the initial concerns will be safeguarding lives and property and quickly re-establishing the Firm's operations at an alternative location where it can continue the business of the Firm's only client, the MP 63 Fund, Inc. (the "Fund"). In the event that the Firm is unable to continue operations, it will alert MSS to the disaster and provide information to share with Fund shareholders as to when it expects to be able to perform. This BCP includes the contact information for every service provider that the Firm relies upon in its service to its client.

The plan anticipates the following risks of business interruption as a result of natural or inflicted disasters, a cybersecurity attack, or a key employee incapacitation:

A) Inability to trade due to system unavailability.

Trading terminals that duplicate the workstation of the Apple computer owned by the Firm were tested on a virtual workstation to confirm that trading could commence in case of an event. Part of the changes introduced in 2020 include providing access to the Interactive Brokers trading platform as issued to the Firm and for use to deal in securities for the Fund. Access and trading software connectivity was tested for accuracy as of 06-08-2021.

On July 1, 2020, a virtual network was created that includes a copy of two of our production servers. These "cloud" copies were successfully tested as part of the 2020 annual test of the Disaster Recovery Plan. Systems restored were all tested for MS Office applications, Advent AXYS, and Trading Systems. Hosting: Support: 866-637-4678.

In an effort to provide more flexibility and simplicity, the Firm moved to a new telephone system in July 2020 hosted and maintained by AM Exclusive.

Telephones and computers with installation cables are maintained in an alternative location described below in this document. In addition, In the event that systems are compromised, we have tested forwarding of our main number and individual extensions to employee cell phones. Forwarding of calls was tested in June 8, 2021.

B) Incapacity of a portfolio manager who is involved in investment decision-making and/or the oversight of the Advisor’s administrative responsibilities

In the event of the incapacity of either portfolio manager, the remaining portfolio manager will take on some of the responsibilities of the incapacitated portfolio manager and Lee Nelson will assume a leadership position. Lee Nelson is the son of the primary portfolio manager, Vita Nelson. Mr. Nelson is also familiar with compliance rules and regulations having successfully completed The Investment Advisor Core Compliance Program co-sponsored by National Regulatory Services and the Investment Adviser Association. He understands the Advisor’s investing strategy as well as the material used to implement that strategy. Since 2017, he has been involved in the formation of the investment strategies that are followed by the Firm and is a participant in portfolio management meetings.

Mr. Nelson’s participation would provide continuity, thus enhancing the Firm’s ability to produce the strong performance results that many of the Fund shareholders have enjoyed since the Fund’s inception in 1999. With his involvement, shareholders will be able to take comfort that the Fund’s historic investment approach and dedication to shareholder value will continue. The Firm’s investment strategies and templates of the unique spreadsheets used to inform investing decisions are maintained in hard copies as well as on files that are backed up nightly onto external hard drives and forwarded to Mr. Nelson before they are removed from the premises.

The Location of this Business Continuity Plan

The Plan is presented at the Fund Website at this location (MP63fund.com/BCP.pdf) Each employee has two copies of this plan, each held at a separate location. The plan is also accessible online at the MP 63 Website at location MP63Fund.com/BCP. Any changes to the plan would be updated at this site and an updated plan would be distributed to employees. Each employee keeps a copy of the BCP on his/her own computer desktop in a folder labeled MP63Fundcompliance.

Office Locations

Advisor’s Primary Office Location

111 Pleasant Ridge Road, Harrison, New York, 10528,
914-925-0022, 800-388-9993

Alternative Physical Location

215 East 79th Street, New York NY, Apartment 14 A

The Firm has no alternative telephone number(s) as the Adviser has established a new telephone service so that the same telephone numbers will ring at the alternative site as at the primary location: The primary telephone number is 914-925-0022. To prepare for such emergency use, the Firm has established WIFI communications in order to have what it needs in order to continue to operate with continuous phone service, continuous access to its records, and continuous access to the service providers upon whom it depends.

Customer Access to Funds and Securities

The Adviser does not maintain custody of customers' funds or securities. In the event of an emergency, there would be prominent notice of the disaster at the Fund's Website, which would explain to shareholders of the Fund that their Fund assets are safely in the custody of the US Bank and that their account records remain safely in the books and records of the Fund's transfer agent, Mutual Shareholder Services (MSS).

Service Providers to the Fund

Data Back-Up and Recovery (Hard Copy and Electronic)

The Firm maintains its records in hard copy format and on local computers on premises at its main office, which are backed up daily and removed from the premises. The Firm records are also stored in a desktop file on the laptop of the Firm's CEO and the CCO.

Original documents are maintained in metal cabinets in a separate structure at the office location .

In the event of an internal or external Significant Business Disruption ("SBD") that causes the loss of our paper records, they can be physically recovered from our back-up remote hard drives maintained by the

CCO and other personnel at an alternative location and away from the main office. If our primary location is inoperable, we continue to operate from our alternative location mentioned above. For the loss of records, we recover from back-ups.

I. Financial Assessments

A. Financial and Credit Risk

In the event of an SBD, the Firm will determine the value and liquidity of the Fund's investments and other assets to evaluate its ability to continue to fund operations and remain operational. If the Firm determines that it is unable to meet its obligations or otherwise continue to fund operations, it will request additional financing from its bank or other credit sources to fulfill the obligations. If it cannot remedy a capital deficiency, it will file appropriate notices with regulators and immediately take the appropriate steps required.

II. Mission Critical Systems

Our Firm's "mission critical systems" are those that ensure prompt ability to transact buys and sells of Fund assets. The Firm's responsibility to provide investment management for Fund shareholders can continue in the event of an SBD by relying on our laptop computers, our mobile telephones, and our phones, which are available at our alternative location.

1. Portfolio Transactions Order Processing

Currently, the Firm makes all the investment decisions for its the Fund under the discretionary investment management contract the Firm maintains with the Fund. During any emergency situation, the Firm will continue to make investment transactions by accessing its brokers through its computers and/or telephones. Critical software to carry on the business of portfolio management is lodged on three different computers: that of Susana Aldas, Byron Perez, and Vita Nelson.

There will be no interruption in the Firm's ability to communicate with its client, service providers, and other of its mission critical systems from the Firm's alternative physical location.

2. Investment Recommendation Order Entry

The Firm enters orders through a designated trader with its executing stockbroker. The Firm has accounts with two brokers. If the primary broker becomes unavailable, the Firm can execute orders by voice with the backup broker. The broker that the Firm uses for trade executions, Interactive Brokers, indicated that the Firm could expect continued service as long as its executing systems are functional. In the event that their services are affected, the Firm would seek the services of the alternative broker with which it has an account to safeguard against such an emergency.

3. Order Execution

The Firm currently executes orders by using the internet to gain access to its executing broker and entering the conditions (price and number of shares) under which it will buy or sell. The broker routes the order to the marketplace where his system finds the best executing price, If the Firm's conditions cannot be met in the market, the transaction will not be executed. The executing broker for the past year, Interactive Brokers, can be accessed through the Firm's laptop computers. In the event of an internal SBD, we would execute

orders through the internet with our executing broker from our alternative physical location.

4. Mission Critical Systems Provided by Our Clearing Firm

The Adviser clears portfolio trades through its custodian bank, which is US Bank. The Adviser submits a copy of all trade executions to US Bank on behalf of the fund via email.

III. Alternate Communications between the Advisor and Shareholders, Employees, and Regulators

A. Shareholders

We now communicate with Fund shareholders who call the Firm using the telephone or e-mail, which will remain available at the alternative location. In the event of an SBD, in which case we would receive mail delivery at the alternative location, a member of the Firm's personnel will retrieve mail from the Post Office box where the Firm receives mail and from the post office that serves the primary location.

B. Personnel

We now communicate with our personnel using the telephone, e-mail, and in person. These practices will continue in event of an SBD.

We also employ a call tree so that senior management can reach all employees and critical systems quickly during an SBD. The call tree includes all staff home and office phone numbers. The manager has all employee phone numbers at his home. The CCO is responsible for the call tree (Leonard Barenboim- 917-432-8618). The CCO retains a list of those he is responsible to contact.

C. Regulators

The Firm is registered with SEC and is listed on IARD with FINRA. We communicate with our regulators using the telephone, a secure SEC website for e-mail, fax, U.S. mail, and in person. In the event of an SBD, we will assess which means of communication are still available to us, and use the most efficient means of communication.

IV. Critical Business Constituents, Banks, and Counter-Parties

Business constituents

We have contacted our critical business constituents and determined the extent to which we can continue our business relationship with them in light of the internal or external SBD. We will quickly establish alternative arrangements if a business constituent can no longer provide the needed goods or services when we need them because of an SBD to them or the Firm. Our major suppliers are Con Edison and Optimum.

Banks

We do not maintain any Proprietary Accounts. The bank maintaining our operating account is J P Morgan Chase, 275 Halstead Avenue, Harrison, NY 10528, 914-777-0140. Francisco Rivera- Branch Manager Francisco.j.rivera@chase.com 914-825-9052.

Regulatory Reporting

Our Firm is subject to regulation by the SEC and FINRA. We now file reports with our regulators using paper copies in the U.S. mail, and electronically using fax, e-mail, and the Internet. In the event of an SBD, we will check with the SEC, FINRA, and any other applicable regulators to determine which means of filing are still available to us, and use the means closest in speed and form (written or oral) to our previous filing method. In the event that we cannot contact our regulators, we will continue to file required reports using the communication means available to us. FINRA, 200 Liberty Street, 10th Floor, New York, NY 10005.

Disclosure of Business Continuity Plan

The Firm does not have a dedicated website; however, this plan can be accessed at the Fund's website. Upon request, we provide a BCP disclosure statement to customers and mail it to customers as a print-out.

Updates and Annual Review

Our Firm will update this plan whenever we have a material change to our operations, structure, business, or location. In addition, our Firm will review this BCP annually, to modify it for any changes in our operations, structure, business, or location. The plan will be tested at least once annually.

Senior Manager Approval

I have approved this Business Continuity Plan as reasonably designed to enable our Firm to meet its obligations to the Fund in the event of an SBD.

Signed: Vita Nelson
